

golden gate™

anterior plate system

ulrich medical® SPINAL SYSTEMS

System

System

- Endoskopisch anwendbares Plattensystem zur ventralen Stabilisierung der thorakalen und lumbalen Wirbelsäule
 - Zweiteiliges Plattendesign für freien Zugang zum Zwischenwirbelraum
 - Kanülierte, konisch zulaufende Polyaxialschrauben
 - Sichere, zentrale Distraction mit systemspezifischem Instrument
 - Perforierte Schraubenspitze zur Zementaugmentation
 - Einfache Handhabung
- Endoscopically applicable plate system for anterior stabilization of the thoracic and lumbar spine
 - Two-component plate design for free access to intervertebral space
 - Cannulated, conical polyaxial screws
 - Safe, centric expansion with system related instrument
 - Perforated screw tip for cement augmentation
 - Easy handling

Indikationen

Indications

Posttraumatische Instabilitäten, degenerative Bandscheibenschäden (z. B. Spondylolisthese, Spondylolyse, spinale Stenose), Frakturen, spinale Tumore.

Posttraumatic instabilities, degenerative diseases (i.e. spondylolisthesis, spondylolysis, spinal stenosis), fractures, spinal tumors.

Inkomplette kraniale Berstungsfraktur LWK 3 (A 3.1)
Stabilisierung mit Knochenspan und golden gate
Kantonsspital Winterthur, Schweiz

Incomplete cranial burst fracture L3 (A 3.1)
Stabilization with bone graft and golden gate
Kantonsspital Winterthur, Schweiz

Inkomplette kraniale Berstungsfraktur BWK 12 (A 3.1)
Stabilisierung mit obeliscPRO und golden gate
Kantonsspital Winterthur, Schweiz

Incomplete cranial burst fracture T12 (A 3.1)
Stabilization with obeliscPRO and golden gate
Kantonsspital Winterthur, Schweiz

Vorteile Advantages

Sicherheit und Stabilität

- Uneingeschränktes Arbeits- und Sichtfeld durch zweiteiliges Plattensystem
- Sichere Distraction über angrenzende Wirbelkörperdeckplatten mit systemspezifischem Distractionsinstrument
- Implantation des Bandscheibenersatzes nach Vorfixierung der C-Platte
- Kanülierte Schrauben und Instrumente für minimal-invasive Anwendung
- Perforierte Schraubenspitze zur optionalen Zementaugmentation
- Metrisches Schraubengewinde für Backout-Schutz
- Farbcodierung
- Hohe Anwendungssicherheit

Safety and stability

- Unlimited working field due to two-component plate system
- Safe expansion via adjacent vertebral body plates using the system related instrument
- Implantation of bone graft/cage after prefixation of golden gate C-plate
- Cannulated screws and instruments for minimally-invasive approach
- Perforated screw tip for cement augmentation
- Metric screw thread for backout protection
- Color-coding
- High application reliability

Einfach und zeitsparend

- Wenig OP-Schritte
- Wenig Instrumente
- Anwenderfreundlich

Simple and timesaving

- Few surgical steps
- Few instruments
- Easy to use
